Environmental and Waste Policy

How we look after Sydney's water, drains and environment while we work.

Our commitment

We meet the environmental laws that apply to our work, including the *Protection of the Environment Operations Act 1997* (NSW) and Sydney Water's requirements for discharges to sewer, and we look for ways to use less water, energy and material.

What we do

- Keep wastewater out of stormwater: drain jetting water, sewage and debris go back to the sewer, never into a gutter or stormwater pit.
- Take our own waste away: old pipe, fittings, packaging and offcuts leave the site with us. Scrap copper and brass are separated for recycling.
- Dispose of old hot water systems and fixtures through recycling and approved waste facilities.
- Leave asbestos-containing material undisturbed and arrange a licensed asbestos removalist when it must be removed.
- Contain spills of chemicals, solvents and sewage straight away, with spill kits in our vehicles, and report spills where the law requires.
- Recommend water-efficient (WELS-rated) fixtures and efficient hot water, including heat pumps through the NSW Energy Savings Scheme.
- Offer pipe relining where it suits the job: it repairs pipes without digging, so less soil, concrete and waste.
- Keep our vehicles serviced and plan each day's jobs to cut driving.

Responsibilities

The Directors provide the systems and resources for this policy. Every worker follows it and reports spills or environmental incidents straight away.

William Demirdonder, Director _____ Date _____

Policy version 1.0, issued 8 November 2026. Next review: November 2027, or sooner if the law or our work changes. Proximity Plumbing Pty Ltd (ACN 606 640 215) as trustee for the Demirdonder Family Trust (ABN 22 729 887 835), trading as Proximity Plumbing, Shop 1/229 Bronte Road, Waverley NSW 2024.
